

# Attachment 3. Status of Groundwater Management Plan

---

Diablo Water District (District) began the process of preparing a groundwater management plan on June 28, 2006 with the adoption of Resolution 2006-6 (**Appendix 3-1**) by the District Board of Directors, which officially set forth its intention to prepare a groundwater management plan. The District's GWMP was formally adopted by the Board of Directors on May 23, 2007 with the signing of Resolution 2007-4 (**Appendix 3-2**). Both of these resolutions were preceded by the appropriate legal notices as outlined in CWC Section 10750 et seq. (**Appendix 3-3**).

As stated under Section 1.1.2 Authority for Groundwater Management, page 1 of the GWMP, the District operated under the proper authority vested in it by the State of California Water code:

“The District is a local public agency that provides water service to customers within its service area. As a result of Assembly Bill (AB) 3030, the California water Code (CWC), Section 10750 et. seq., provides local agencies with the authority to adopt and implement groundwater management plans. As described further below, the CWC was subsequently amended as a result of Senate Bill (SB) 1938 (Machado), effective January 2003. On June 28, 2006, the District Board of Directors voted to adopt a resolution of intent to prepare a groundwater management plan, in accordance with the requirements of the CWC.”

For the purposes of this application, the District's groundwater management plan has not been included in its entirety. Instead, the title page and table of contents are included in **Appendix 3-4**. A full copy of the GWMP is available for download on the District's website at <http://diablowater.org/documents/>.
